Loss Mitigation Processing Systems

This information kit is designed to provide you with a solution not just for your existing business model, but for a potential, scalable future expansion. On the following pages, you will find the current pricing for both our **Standard Processing Platform** with built in CRM and work flow sets customized for Loss Mitigation (Loan Modification, Short Sale, and Forensic Audit) and our **Private Labeled Do-It-Yourself Loan Modification Platform**.

Standard Processing Platform

Each user within your internal organization and any external employee, satellite branch, referral partner, etc... will have a user name and password to access the company platform and see only their client files. There are several user types within the Standard Processing Platform.

Back Office Employee:

- Quality Control
- Processor
- Negotiator
- Attorney
- Manager

Branches:

- Sales Managers
- Account Executives
- Law Offices
- Broker/Net Branch
- Realtor Office
- Company Divisions

Under each **"Branch"** the system will hold unlimited **"Agents"** which is similar to Sales Rep, Referral Partner, Loan Officer, Realtors, etc...

Our processing platform makes it easy to run a multi-level organization, where tracking, accountability, pipeline management, auto-document preparation, online file submission, and reporting are essential.

Private Labeled Do-It-Yourself System

This platform is design for the company/person interested in providing a loan modification solution to homeowners without being hands on with the client. This platform is Self-Serve and can run on its own. Homeowners will register online, pay online, and complete forms online, which convert into a **Bank Ready Loan Modification Package**. The package comes automatically completed with all necessary docs like Cover Sheet/Letter, Income/Expense Worksheets, Hardship Letter, Detailed HAMP Proposal, 4506-T, Schedule of Real Estate (if applicable), Profit and Loss (If Applicable) and a detailed E-book explaining the process, outlining guidelines, and providing tips for success.

Both platforms can be seamlessly integrated into one platform for easy client file management or setup up separately.

In today's marketplace, it's common to have employees spread out over the entire country. You may have some of your corporate staff, branches, and agents working in your central office, and tens, hundreds, or even thousands of others working in regional branches and home offices— out of sight and disconnected from your corporate hub. A Hosted, Managed Service through TheModPost keeps your entire company centralized in a single system, provides you with end to end control, automates branch and user management, and enables quick and easy business expansion.

The Power of TheModPost—with None of the Administrative Hassles

With TheModPost platform users access their pipeline through any standard Web Browser with a broadband connection. TheModPost makes sure that your system is running and reliable and that your pipeline is available 24/7. Deployment is quick and easy and you get to avoid infrastructure and support costs that come with managing software applications in-house.

Used by Mortgage Professionals, Processing Firms, Non-Profit Counselors, and Law Offices nationwide, TheModPost is likely to be the most versatile and cost-effective method to provide access to your online submission portal and file management system for your entire organization and clients.

Guaranteed Reliability and Security

Using the latest in data security, system redundancy, and fail over protection technologies, and by storing your borrower files on highly secured data center operations within the U.S., we ensure that your platform is always on and available at a moment's notice. Our world-class data centers and data security processes provide the highest level of security for our customers' proprietary information. Since no data is stored on the user's workstation, there is no risk of compromising your customer's information if that workstation crashes or is lost or stolen.

Easy Business Expansion

As your business grows, TheModPost platform grows with you. Our hosted solution supports companies of any size, making it an ideal solution whether you have five users or 5,000. When you add new employees, they can easily access TheModPost from home or a new branch office without implementing complicated hardware or software. With just a computer and broadband Internet connection, your employees will be connected in no time and you'll have complete control and visibility into this expanding portion of your business.

Key Hosting Benefits

- Increased Corporate Control
- Simplified Branch Management
- Quick and Easy Business Expansion
- Custom Application/Software Development
- Robust Security
- Data Backup
- Disaster Recovery
- Software Updates and Maintenance

Success in today's mortgage industry is all about being strategic.

With TheModPost, our robust Website Development, Work Flow Management, Multi-User Architecture, Automatic Document Preparation, and Electronic Document Management solution, you can attract new leads, market your business, strengthen borrower and partner

TheModPost, A Division of The Loan Post, Inc.

relationships, cut time and costs and bolster data security—all for just \$30-\$75 per user, per month.

- You get unlimited usage and bandwidth to upload, download, and store documents securely online, while providing restrictive access to your back office staff (i.e. Processor, Quality Control, Negotiators, Managers, etc...)
- Attract new leads with a professional, scalable and search-engine friendly website that is completely integrated with your ModPost software
- Follow up on opportunities with One-Click Follow Up, which triggers voice calls to your prospects and current clients.
- Give clients, agents, branches and any other partners access to your branded online business center where they can securely check status updates, retrieve document requests, and also receive E-mail update notifications/summaries.

Customer Resources

Your continued success is our top priority. With resources in place to help you from the point of installation and roll out, through tailored individual user training, toll free technical support, live chat, pre-recorded training sessions, and weekly webinars, you are guaranteed to be successful with your ModPost Processing Platform.

Training

Knowledge is power. To ensure that you get the most out of TheModPost and learn how to use your new processing platform to effectively manage and grow your business, we offer comprehensive onsite and online training for system administrators and end-users. If you're a system administrator, we can train you on setting up and configuring TheModPost platform so your system meets your company's specific needs. If you're an end-user, we'll train you on the key concepts you need to successfully complete your work inside TheModPost.

Pre-recorded tutorials include:

- Adding New Files
- Adding New Users
- Processing Work Flow
- Using the Dashboard
- Electronic Document Management
- Automatic (Custom) Document Preparation
- Online Status for all parties involved
- Additional pre-recorded tutorials are available that provide more in depth instructions on specific tasks within the software so you can learn about key features and capabilities at your own pace.
